

Rotomaxx[™]

High Torque, High Flow, Right Angle Mixers

Built to sanitary standards at a competitive price

For larger tank volumes requiring rapid turnover & high efficiency agitation, but also designed to meet stringent CIP washdown, pressure washing and steam cleaning conditions. The Rotomaxx is available in both a Pharmaceutical or a Food grade, all stainless configuration, with multiple output speeds and seal combinations. Our Jetfoil[™] impeller technology provides 200% of the pumping rate found on conventional axial blade impellers.

Big performance in a compact package

- Total washdown capability with R TPV (#73-01) compliance
- Tank Volumes to 38,000 liters
- Pumping Rates to 75,000 LPM
- 1/2 to 3 HP, 30-235 RPM output speeds
- Right angle design for low headroom space
- Validation documentation & factory acceptance testing (FAT) for GMP and FDA requirements

With a small footprint and low headroom design, the Rotomaxx is ideal where space is critical on large tanks

Rotomaxx Specifications

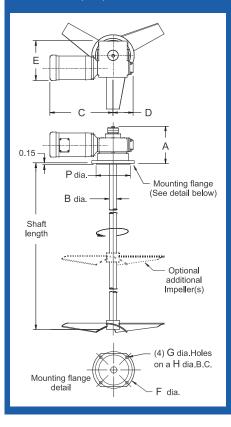

The Rotomaxx series of stainless steel mixers are available in three (3) basic configurations as shown below:

Mixer Model	125 RMAX	150 RMAX	200 RMAX
Output Speed (RPM)	30 - 235	30 - 235	30 - 235
HP Range	0.37 - 1.5	0.37 - 2.5	0.55 - 2.5
Shaft Diameter	32	38	50
Maximum Shaft Length (mm)	up to 2413	up to 2.692	up to 4191
Foil Diameter (mm)	up to 1397	up to 1.651	up to 1702
Pumping Rate @ 1 cps (ltr/min)	49,210	77,600	90,092

Rotomaxx

	А	В	С	D	Е	F	G	Н	Р
125RMAX	226	31.8	419	89	208	230.6	10.7	203.2	165.1
150RMAX	226	38.1	472	89	216	230.6	10.7	203.2	165.1
200RMAX	279	50.8	569	114	249	285.0	13.7	254.0	203.2

units are in mm C & E may vary with motor selection

Ease of Installation & Service

The modular design of the Rotomaxx components, along with the hollow quill bore of the reducer, allows for easy mounting and servicing.

SS Motors ----

are directly coupled to eliminate misalignment.

SS Gear Reducers

include a hollow bore to eliminate shaft couplings.

SS Pedestals

allow easy seal disassembly and are registered for perfect seal alignment.

Removable SS Shaft

is both keyed and retained above the hollow quill to eliminate slip.

SS Jetfoil™ Impellers

are keyed, welded or can be bolted construction where space is limited.

Selection & Performance

Selection of the proper Rotomaxx model for your application is simplified with our **MixxScale** sizing criteria. Our **MixxScale** program utilizes bulk fluid velocity and impeller size (foil diameter to tank diameter ratio) to provide the desired level of agitation, suspension of solids and top-to-bottom flow control. Our high efficiency Jetfoil[™] impellers provide maximum performance using the lowest horsepower consumption and an optimized gearbox size to reduce overall costs.

Our **MixxScale** (MS) selections range from 1 through 4 with MS = 1 providing a lower level of agitation with little vortex and longer blend times (10-30 minutes), while MS = 4 is characterized by very vigorous agitation with excellent suspension and very rapid blend times of under 10 minutes. The following tables provide the best Rotomaxx selection for the designated level of agitation, tank volume and viscosity.
