

Are you working with these ingredients?

- Sugar at high solids
- Gelatin
- Pectin
- Starches
- Flour
- Corn Syrup (HFCS)
- Milk Powders (NFDM)
- Cocoa Powder
- Whey Powder
- Sweetened Condensed Milk
- Xanthan Gum
- Guar Gum
- Gum Arabic
- TiO₂
- Stabilizers
- Flavorings
- Coloring
- Caramel
- Egg
- Oil

Do you manufacture these products?

- Candies and Confections
- Chocolate Products
- Sugar Coatings
- Fruit / Flavored Fillings
- Gummies
- Glazes
- Candy Bars
- Chewing Gum
- Jams & Jellies
- Caramel
- Hard Candies
- Marshmallow

Are these problems affecting your operation?

- Long Mix Times
- Lumps, Clumps, Fisheyes
- Cleaning and CIP Issues
- Clogged Filters / Frequent Strainer Replacement
- Mechanical Seal Failures
- Excessive Ingredient Waste
- Dusting Issues
- Wasting Out-of-Spec Product

Admix leads the industry with advanced mixing technologies. Our high speed in-tank, inline, and powder induction & dispersion solutions are designed to help our Confection clients process products faster, better, cheaper, and safer.

We offer mixing solutions for your Confection applications:

- **SUGAR SLURRIES** – Rapid make up of high solids slurries, as high as 78° Brix, for ingredient use or coating solutions
- **RECONSTITUTE COCOA & DAIRY POWDERS** – Short mix times, minimum foaming, no lumps and full incorporation
- **SWEETENED CONDENSED MILK** – Save on shipping costs & storage by making sweetened condensed milk on demand
- **FILLINGS** – High % solids, powders, gums, pectin, gelatin are dispersed fully and rapidly
- **REWORK** – Eliminate waste and high cost of disposal
- **MAINTENANCE** – With top entry, you will never worry about bottom entry mechanical seals again!
- **FILTERS** – Avoid constantly clogging filters, reduce replacement costs and fully utilize all your expensive ingredients in your recipe!
- **HYGIENIC** – Our mixers are all available with stainless steel drives, with no paint to chip or peel

3-A Sanitary
Certification across
many product lines.

IN-TANK BATCH PROCESSING

Rotosolver[®] High shear dispersers from lab to production sizes

Rotomixx[®] Hygienic low shear mixer and tote agitator

Rotomaxx[™] High torque right angle mixers

INLINE MIXING & MILLING

Dynashear[®] High shear 2-stage disperser and emulsifier

Boston Shearmill[®] Heavy duty wet mill with up to 9 high shear zones

Admixer[™] Static mixer blending of miscible fluids

POWDER INDUCTION & DISPERSION

Fastfeed[™] skid mounted system that simultaneously inducts & disperses powders at high-speed rates

Contact Admix to schedule a **plant audit, equipment test** or to learn about an **equipment trial** or **process assurance warranty**.
