

Are you working with these ingredients?

- Carbopol[®]
- Methocel[®]
- Emulsions
- Starches
- Gums
- Oils
- Resins
- CMC
- TiO₂
- Wax
- Sodium Hydroxide
- Extracts
- Pigments
- Vitamins
- Minerals
- Parabens
- Formaldehyde
- Tocopherol
- Glycerol
- Aloe Vera
- Acids
- Peptides

Do you manufacture these products?

- Natural & Vegan Cosmetics
- Moisturizers & Sunscreens
- Soap, Cleansers & Scrubs
- Hydration Gels & Serums
- Makeup & Makeup Remover
- Toothpaste & Mouthwash
- Hair Care Products
- Supplements
- Toner
- Perfumes
- Nail Polish
- Air Fragrances
- Detergent

Are these problems affecting your operation?

- Long Mix Times
- Lumps, Clumps, Fisheyes
- Cleaning and CIP Issues
- Inadequate Dispersions
- Over Shearing
- Inconsistent Product Quality
- Unstable Emulsions
- Wasting Out-of-Spec Product

Admix leads the industry with advanced mixing technologies. Our high speed in-tank, inline, and powder induction & dispersion solutions are designed to help our PC&C clients process products faster, better, cheaper, and safer.

We offer solutions for your personal care & cosmetic applications:

- **WATER PHASE** – Rapidly deagglomerate thickeners, eliminate fisheyes
- **OIL PHASE** – Drastically reduce mix times, emulsify in minutes instead of hours with conventional agitators
- **COMBINATION PHASE** – Proper shear with extremely high flow, without the concern of over shearing
- **VERSATILITY** – Large and small batches in one tank
- **INCREASED EFFICIENCY** – 200% more flow per horsepower over conventional high shear mixers
- **INLINE** – Shear on a recirculation loop is ideal to augment low speed tank mixing
- **FINISH** – Effectively add a ‘finish’ on the product on the way to the filler
- **SAFETY** – Operators can safely dump powders from floor level
- **HYGIENIC** – Our mixers are all available in stainless steel

3-A Sanitary
Certification across
many product lines.

IN-TANK BATCH PROCESSING

Rotosolver[®] High shear dispersers from lab to production sizes

Flowshear[™] High shear bottom mount disperser

Rotomixx[®] Hygienic low shear mixer and tote agitator

Rotomaxx[™] High torque right angle mixers

Rotomaxx[™] II Low speed, large capacity low shear mixer

INLINE MIXING & MILLING

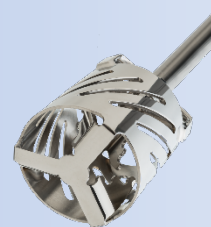

Dynashear[®] High shear 2-stage disperser and emulsifier

Boston Shearmill[®] Heavy duty wet mill with up to 9 high shear zones

Admixer[™] Static mixer blending of miscible fluids

POWDER INDUCTION & DISPERSION

Fastfeed[™] skid mounted system that simultaneously inducts & disperses powders at high-speed rates

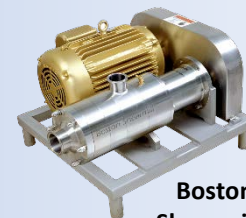

Rotosolver[®]
Patented

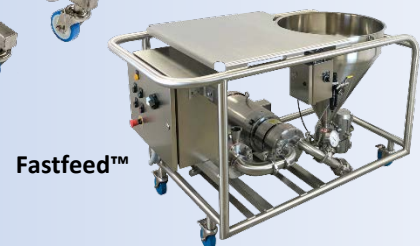

Flowshear[™]

Dynashear[®]

Boston Shearmill[®]

Fastfeed[™]
